

Doug Jones reprehensible record against life!

In a stunning and unprecedented move, the Alabama Senate passed a resolution in May 2017 condemning freshman Sen. Doug Jones, D-Ala., for his vote Jan. 29 against banning late term abortions.

Sixty votes were required to end the filibuster against the [Pain-Capable Unborn Child Protection Act](#) and advance the bill. The vote was 51-46 — with 44 Democrats including Jones voting no — and thus it failed to come to a vote.

[During the campaign](#) against Moore, Jones said "the law for decades has been that late-term procedures are generally restricted, except in the case of medical necessity. That's what I support."

Sen. Jones owes the people of Alabama an explanation for turning his back on a campaign promise he made. Doug Jones not only is 100% pro-abortion throughout all nine months of pregnancy he also is in favor of forcing all taxpayers to pay for abortions even if they morally oppose, especially ending the life of a late term human being capable of feeling pain.

Now Sen. Doug Jones shows his true colors he considers a vote on protecting babies at 5 months of development “a stupid question”.

See him laughing about the matter here:

No one in Alabama concerned for the Right to Life should consider voting for Doug Jones to represent AL in the US Senate.

Jones voted to Impeach the President of The US with no facts against President Trump.

Jones won't even do the job he is being paid for and openly states he will refuse to vote on the President's Supreme Court Nominee.
